

U.S. DEPARTMENT OF INTERIOR  
BUREAU OF LAND MANAGEMENT  
SALEM DISTRICT

**DECISION RECORD**

Based upon the attached Categorical Exclusion Review, OR-086-08-07CX, I have determined that the proposed Pisgah Progeny Salvage project does not involve significant impacts to the human environment and requires no further environmental analysis.

It is my decision to implement the Pisgah Progeny Salvage project and authorize salvage harvest of approximately 30 dead and down trees on approximately 5.5 acres of land in T.4N, R.2W, section 31. Harvest operations will be conducted with ground-based equipment from existing rocky roads and skid trails. Operations will be limited to the dry season, and are expected to take approximately two to three days to complete. No road construction or improvement will be required. Roads to be used for hauling logs are gravel surfaced or paved.
